# Testimonials

*I wish to say that my children's health needs have been met above and beyond my prayers. The care and efforts of my doctor is amazing. My son has asthma and has never felt better since he started being seen there. The doctor is kind, efficient, and professional. Everybody on her team is nothing but a blessing to me.*

*From a Mother's Heart*

*As a new mom, I was pleased with the care my baby received. All my questions and concerns were answered before I even took my list of questions out of my purse. I always feel so comfortable talking to the physicians and staff. Thank you for all the good work you do.*

*Sharon, Cocoa*

*My teenager's insurance changed and we were in a bind trying to find a new pediatrician after so many years. Brevard Health Alliance was very welcoming and made the transition so smooth. My daughter has numerous health issues due to her struggle with her weight. The physician took the time to listen to her and her needs. She was given alternatives on how to work on her weight and has been guided in the right direction. I am extremely pleased. My daughter's health has improved significantly. I'm very grateful to have BHA in my community.*

*Meredith, Palm Bay*

*I received a call one day from my child's school about a fall my son had. I did not have any insurance and felt like the worst parent in the world. The school pointed me in the direction of Brevard Health Alliance and told me they would be able to assist me. I was able to register my child and obtain an appointment for him that same day. It so happened that my son had a broken clavicle. The case manager assisted me with getting insurance for him and finding him specialty care. Our family got the help we needed. Now, I bring all my children to BHA and they receive the best care.*

*Thank you, Jade*
